

Adjustable Minute Meter Guard

93380313

Description

Our Adjustable Minute Meter Guard has been ruggedly engineered to secure all styles of ringless meter sockets and CT cabinets on your system regardless of material thickness. Fabricated entirely from case-hardened steel, and plated for protection against the elements, this security device will maximize your investment in meter security.

For added strength and flexibility, the Adjustable Minute Meter Guard incorporates a hex design that allows the top plate to adjust in 60° increments. This feature is desirable when mounting near conduit or odd shaped enclosures.

Benefits/Advantages

- ◆ Two-piece housing for full adjustment to material thickness.
- ◆ Uses same compact installation kit as standard Minute Meter Guard.
- ◆ Accepts any standard length barrel lock, including the REVPRO® series.
- ◆ Re-engineered for increased durability in the field.
- ◆ Lock is fully shrouded for maximum security.
- ◆ Impervious to hammer blows, sawing, and other forms of physical attack.
- ◆ Available with metal or plastic sealing ferrules.
- ◆ T-Handle wrench available from the factory for adjustment screw.
- ◆ Manufactured entirely from case hardened steel and plated for use in corrosive environments.
