

Speedy Bottom Mount

Speedy Bottom Mount

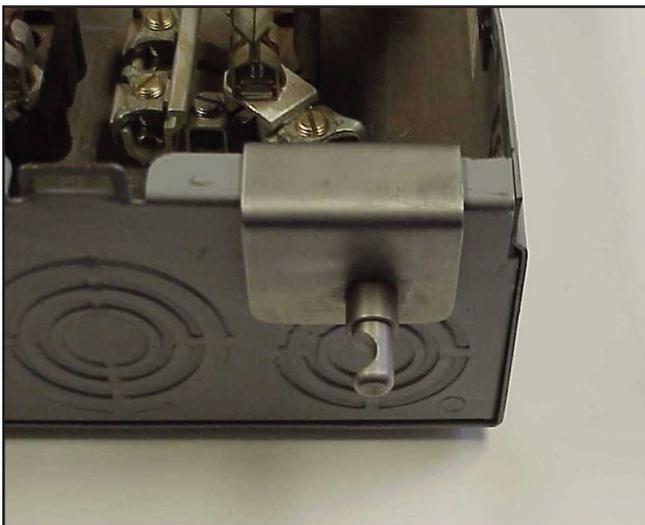

Description

The Speedy Bottom Mount is a cost effective method for locking off ringless meter enclosures to prevent theft of service and meter tampering. This locking device has been designed to easily secure the bottom of a ringless meter enclosure cover. This unique design allows for the bracket to be installed without the use of tools.

Before mounting choose the location on the bottom of the enclosure and slide the bracket over the enclosure lip. Replace the enclosure cover, place the lock housing over the bracket stud and install the barrel lock in the housing and the installation is complete.

Benefits / Advantages

- ◆ Case Hardened Carbon Steel
- ◆ Unique Corner Design Locks Off Both Side and Bottom With One Barrel Lock
- ◆ Also Configures as a Bottom Mount
- ◆ Accepts Standard Length Barrel Locks
- ◆ Cost Effective
