Carbon Steel Lock - 93180800

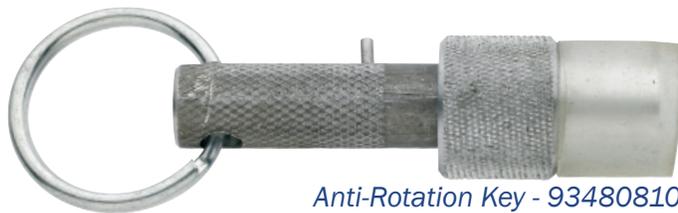

Stainless Steel Lock - 93180805

Short Lock - 93180820

Standard Key - 93480800

Anti-Rotation Key - 93480810

### Description

Highfield's REVPRO® Barrel Lock and Key technology provides utilities one of the highest levels of security in the industry. Our proprietary design allows for thousands of non-interchangeable unique key code combinations that are registered and controlled at the factory. Therefore, each utility account has its own combination, unique to its clientele.

One of the key features of our REVPRO® technology is its pick resistance, thus offering the highest degree of protection. The REVPRO® Barrel Lock incorporates a pin tumbler design, which we believe is superior to a disk tumbler or conventional plunger design in use today.

### Benefits/Advantages

- ◆ Latest in material and component design technology.
- ◆ Totally interchangeable - fits all existing hardware.
- ◆ Available in standard or short barrel lengths.
- ◆ Thousands of factory registered key codes.
