

Preloaded #6 Padlock

93180520-6

93180531-6

Typical Installation

Description

Our, Preloaded #6, one-piece Padlock has been designed for durability and ease of installation on a variety of metal or ABS enclosures. No key is required for installation. The internal lock mechanism of the padlock can be custom-manufactured to provide any one of a variety of barrel lock systems. All major components are plated, case hardened steel for maximum protection against tampering and the elements. Specify Highfield for all your security needs.

Benefits/Advantages

- ◆ One-piece construction for total ease of installation - installs in virtually seconds.
- ◆ All padlocks shipped in preloaded mode from factory.
- ◆ Padlock installed without using a barrel lock key.
- ◆ Locking mechanism totally retained in padlock body.
- ◆ Internal lock components can be “keyed” to several Utility barrel lock key systems.
- ◆ All components are hardened steel for maximum durability and security.
- ◆ Available in 1/4" and 5/16" shackle diameters and “short” and “long” shackle heights.
