

# Cast Lock-Wing Protector

Typical Wing-type Valve Installation

## Description

Our cast lock wing protector has been ruggedly engineered to maximize protection for your wing-style gas service valves. Fabricated from a high-grade cast steel alloy and plated for protection against the elements, this security device will maximize your investment for your valve security needs.

## Benefits/Advantages

- ◆ One piece construction for fast installation
- ◆ “Hooded” design completely covers and protects valve stem -eliminates “peeling” attempts
- ◆ Small size fits ¾" through 1¼" service valves, larger size fits 1½" and 2" valves
- ◆ Available with or without die cast seal ferrule option
- ◆ Re-engineered for added strength in the field
- ◆ Secured to wing valve with standard length utility barrel lock -no end cap required
- ◆ Lock and valve are fully shrouded for maximum security
- ◆ Impervious to hammer blows, sawing, and pry bars
- ◆ Stronger than cast wings on valve and competitive sheet metal security devices
