

Integral REVPRO® Padlock

ETO-93180500-RXX

Typical Installation

Description

The Integral REVPRO® Padlock has been engineered specifically for utilities. Finally, the same key will operate both barrel locks, as well as REVPRO® padlocks. There is no longer a need for field investigators to carry different keys for different security devices. REVPRO® locks and keys are *only sold* to Utility companies, and keys are *only available* from Highfield Mfg. Co. Specify REVPRO® for all your meter security applications.

Benefits/Advantages

- ◆ One-piece construction for total ease of installation - installs in seconds.
- ◆ REVPRO® lock cylinder is an integral part of the padlock assembly - *eliminates lost barrel locks!*
- ◆ Lock components are all stainless steel for reliability in corrosive environments.
- ◆ Available in short and long shackle lengths, 5/16" and 1/4" diameter shackles.
- ◆ Keys can be coded the same for *both* REVPRO® padlocks and REVPRO® barrel locks.
- ◆ Housing and shackle are fabricated entirely from case hardened steel to protect from physical attack.
- ◆ Lock cylinder opens and closes with a 90 degree turn of the REVPRO® key.
- ◆ Lock cylinder is "key-retaining" for protection against lost or misplaced keys.
- ◆ REVPRO® factory-cut keys are only available from Highfield, and are not commercially available.

Part Number	Description
ETO-93180500-RXX	Integral REVPRO® Padlock - 5/16" dia. Short Shackle
ETO-93180501-RXX	Integral REVPRO® Padlock - 5/16" dia. Long Shackle
