Gas & Water Utility

SECURITY PRODUCTS

ABOUT US

Setting the Standard for Utility Security & Revenue Protection

Highfield Manufacturing Co. is an innovator and leading global manufacturer of high-quality security systems for the electric, gas, water and CATV utility industries. We understand that safety, security and protection are critical.

Our Capabilities

- 80+ years of proven dependability combating meter tampering
- Short lead times
- Pre-sale & post-sale application & service support by experts
- On-site R&D lab for rapid prototype production
- Knowledgeable & committed customer care team
- Wide range of products for advanced protection of conventional & smart meters

Key Industries

- Electric Utility
- Gas Utility
- Water Utility
- Telecommunications
- Other

Certifications

- ISO 9001:2015
- RoHS Compliant

Manufacturing Facility

- 150,000 Square Feet
- Research & Development Lab
- CNC/DNC Machine Shop
- Internal Six Sigma
- Lean Manufacturing
- On-Site Quality Assurance Lab

BARREL LOCK & KEY SYSTEMS

Highfield offers a variety of barrel lock and key configurations that provide a range of security levels for the utility industries. We design our barrel lock and key systems to provide a user-friendly experience and increased level of security above conventional barrel locks.

#4 Barrel Lock & Key System

Description
The #4 Locking System is a cost effective way to meet your security requirements.

BARREL LOCK SERIES	PART NUMBER	DESCRIPTION
#4 Series	93180100	#4 Silver Lock With End Cap
#4 Series	93180100WS	#4 Lock With Seal Disk & End Cap
#4 Series	93180102	#4 Silver Lock Without End Cap

#6 Barrel Lock & Key System

Description

The #6 Barrel Lock and Key System provides a smooth plunger design and heavy spring for pick resistance. In addition to optional stainless steel construction, this barrel lock and key system also meets the interchangeability requirements with other manufacturers' lock and keys.

Note: The #6 key can be used to open a #4 lock.

REVPRO® Barrel Lock & Key System

Description

REVPRO® Barrel Lock and Key technology provides utilities one of the highest levels of security in the industry. Our proprietary design allows for thousands of non-interchangeable unique key code combinations that are registered and controlled at the factory. We believe our pin tumbler design is superior to a disk tumbler or conventional plunger design as it provides the highest degree of protection against pick resistance.

Garrison Lock & Key System

Description

Built on Highfield's 80+ years of experience, the Garrison Lock and Key System offers the highest level of utility security and revenue protection. Improved features include preload capability, a dual-orientation key interface and a standard weather seal that eliminates sleeve rotation when fully enveloped in a lock housing. A new, classic-style key handle design also improves functionality. All non-interchangable, unique key code combinations are registered and controlled at the factory.
Note: All Garrison locks are stainless steel.

SECURITY HARDWARE

Maximizing Security

Highfield offers a variety of security hardware solutions for the gas, water and electric utilities. Our products maximize security, prevent tampering, and safeguard lock-offs for any meter or valve. Our products are designed to protect revenues by minimizing theft of service and preventing meter tampering or bypassing.

Cast Wing Valve Protectors

Description

Highfield's Cast Wing Valve Protectors are ruggedly engineered to maximize protection for your wing-style gas and water service valves. They are manufactured from a cast hardened steel alloy and plated for protection against the elements.

PRODUCT SERIES	PART NUMBER	DESCRIPTION
Cast Wing Valve Protector	93210153	Cast Wing Valve Protector For ¾" Through 1¼" Valves
Cast Wing Valve Protector	93210152	Cast Wing Valve Protector For ¾" Through 1¼" Valves With Seal Mount

Lock Seal Assemblies

Description

Lock Seal Assemblies are cost-effective locking and sealing devices in a single unit. They can be installed on a wing or wingless style gas meter connection nut with mating security hardware. The lock seal provides positive protection against unauthorized use of gas as well as readily providing evidence of any tampering.

LOCK SEAL COMPONENT	PART NUMBER	DESCRIPTION

UTILITY PADLOCKS

Highfield's utility padlocks have been designed specifically for use on electric, gas and water distribution systems. Among the multitude of applications, the padlocks can be used to secure wing type valves, electric meter installations, electrical switchgear installations, CT cabinets, and other assorted enclosures or equipment with a latch or provision for a padlock.

Our barrel lock and key systems are manufactured with plated and case hardened components for corrosion protection and a longer durable life. They are available in copper, cadmium or chromate finishes, for quick and easy visual identification.
Universal Utility Padlocks

Description

Universal Utility Padlocks are secured in place with any standard length utility barrel lock, thus eliminating additional keys to be carried by field personnel. Specially keyed barrel locks are available upon request from Highfield in either #6, Beta, REVPRO® or standard barrel lock.

GAS SAFETY VALVES & SWIVEL PRODUCTS

In the event of a fire, the Highfield Fusible Fire Valve will permanently shut off the flow of gas at the service entrance or gas meter. The spring-loaded internal plunger mechanism automatically activates when the ambient air temperature reaches 136 degrees Fahrenheit. This causes the plunger to immediately close against the valve seat preventing gas from feeding a fire, drastically reducing the amount of potential fire damage to your property.

Highfield can also assemble customized kits comprised of our gas valves and swivels, guaranteed to fit each other precisely, ensuring a level installation of your gas meter.

KITS & ACCESSORIES

Lock Extractor Kits

Kits and accessories from Highfield are engineered to provide operating field personnel with a safe, efficient, lightweight tools for installation, repair, removal or added protection of meter rings, ringless meter sockets, wiring troughs, CT cabinets and other assorted enclosures in your system.

Description

Lock Extractor Kits from Highfield are engineered for fast, efficient removal of inoperative barrel locks from any type of security hardware on a utility system. The unique design of the extractor element utilizes a reverse taper pin. This allows the lock to be "grabbed" by the inside diameter of the keyhole avoiding damage to the surrounding hardware. In many cases, the equipment may be re-used after extraction of the lock.

Why Choose Highfield Manufacturing?

With over 80 years of experience, Highfield Manufacturing Company partners with utility companies by providing cost-effective, high-quality security solutions that can withstand the harshest environments. Each product is designed to offer an additional robust barrier against theft, not only deterring it but often stopping it all together.

Valuable Expertise
A durable product offering is accompanied by global sales specialists, customer service and maintenance support teams, available anytime.

Ease of Doing Business
Highfield's central location for design, manufacturing, assembly and testing allows us to provide dependable, reliable service at a lower cost with reduced lead times.

Dedication to Quality
Highfield products are assembled in the U.S. at our 150,000 sq. ft., ISO 9001:2015 certified facility. Our on-site engineering team and robust testing ensure a quality product every time.
