Typical Application

## Description

Highfield Gas Clam Shell Security Hardware has been designed to effectively and economically prevent unauthorized use of gas. Once installed on a wingless gas valve, and secured in place with either the lock seal assembly or desired barrel lock and cap, the security hardware protects the cast iron valves from damaging blows and will insure that the gas valve is locked in the closed position. Our clam shells have been engineered to fit a full range of gas valve sizes from ½" N.P.T. through 2" N.P.T.

## Construction

- ◆ Fabricated of heavy gauge steel, plated and powder-coated for corrosion protection.

## Installation

- ◆ Turn head of gas valve stem to the closed or off position.
- ◆ Install hardware and secure in place with either the lock seal assembly or desired barrel lock and endcap.

Part Number	Description
93280170	½" - ¾" Clam Shell - hinged
93280174	1" - 1 ¼" Clam Shell - hinged
93280178	1 ¼" Clam Shell - hinged
93280182	1 ½" Clam Shell - hinged
93280186	2" Clam Shell - hinged
