

SSV Meter Rings

93380340

93380340-SS

Typical Installation

Description

The one-piece SSV Meter Rings from Highfield have been engineered for ease of installation and maximum protection against tampering attempts on ring style meter sockets. As is the case with the Highfield family of hinged Meter Guard Rings, the new one-piece solid ring is ideal for both individual residential sockets and multiple apartment meter panels.

A key feature of the SSV Meter Ring line is the ergonomic comfort designed into the SSV stainless steel meter ring model. The ring's new optional grips improve the ease of handling when installing multiple rings and barrel locks onto meter sockets, while maintaining the same durability and security present in other Highfield SSV ring designs.

The "V" shaped footprint of the lock housing still deters physical attack better than any other meter ring on the market.

Construction

- ◆ One-piece, welded construction.
- ◆ Fabricated from all stainless steel components, no dissimilar metals.
- ◆ Lock housing is heavy gauge stainless steel for added security.
- ◆ Meets all ANSI, EUSERC and other domestic and foreign customer standards and material specification.

Benefits/Advantages

- ◆ One Piece: installs in seconds - notched wide rear flange.
- ◆ No exposed tabs eliminate pry points.
- ◆ "V" lock housing deflects hand tools; extra strong 14 Ga. material.
- ◆ All stainless steel construction offers years of corrosion-free and dependable service.
- ◆ Utility seal must be totally compromised to remove ring from meter.
- ◆ Fully compatible - accepts standard or short length barrel locks.
- ◆ Accepts all seals - optional metal or plastic break-away seal mount available.
- ◆ Suitable for AMI/AMR meters.
- ◆ Compact -- small footprint is ideal for "gang" meters.
